FICTIONAL SAMPLE - NOT A CUSTOMER RESULT

All examples below are invented to show a possible report format. No visit, company check, record retrieval, photo capture or customer acceptance took place. No price or delivery date is offered.

Field visit evidence pack

Example question: What could a permitted visit to a proposed supplier location document, and which questions would remain open?

1 / Scope recorded before the visit

The agreed address, visit window, access permissions, questions, required photographs and evidence limits. The written quote identifies the legal contracting entity and the responsible delivery owner.

2 / Observation log - illustrative rows

Evidence reference	Example entry	Limit / open question
PHOTO-EX-01 (no file included)	Sign observed at a fictional example address	A sign does not prove ownership or solvency.
NOTE-EX-02 (no visit occurred)	Production activity visible from a permitted area	No quality, capacity or delivery guarantee.
RECORD-EX-03 (no record retrieved)	Requested record and retrieval date to be logged	Source availability and meaning need review.

3 / Delivery and customer review

A project may include a report, permitted photo/video files, a source log and agreed metadata. File references must match delivered files. Acceptance criteria, revisions, access, retention and deletion are agreed before work starts.

4 / What this report cannot establish

This is not a certified audit, legal opinion, credit assessment or assurance of a supplier's future performance. Observed facts, supplied statements, source records and unresolved questions must remain separate.
